EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Dianne Rees on February 15, 2005.

The application has been amended as follows:

On Claim 8, "wherein the biopolymer is selected from the group consisting of polypeptides and nucleic acids" has been changed to – wherein biopolymer on the biopolymer array comprises polypeptides or nucleic acids --.

Claims 11-14, 19 and 22 have been cancelled.

Allowable Subject Matter

2. **Claims 1-10, 15-18, 20-21 and 23-24** are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 1-10 are allowable because the prior art fails to disclose or make obvious, either singly or in combination, a method of scanning an array comprising, in addition to the other recited features of the claim, "scanning a first row with said lens assembly, utilizing an adaptive control algorithm to maintain focus on said array features in said first row by accounting for a slope of said substrate, calculating an lforward integral term up to or near an end of said first row, revering scan direction to

scan a second, adjacent row, and initially using the negative of said forward term to set a focus of said lens assembly at a start of scanning said second row".

Claims 15-18, 20-21 and 23-24 are allowable because the prior art fails to disclose or make obvious, either singly or in combination, an optical scanning system comprising, in addition to the other recited features of the claim, "said processor is adapted to control of said lens for sequential opposite-direction scans on array features situated on an array substrate to be carried by said caddy, by utilizing the negative of a forward integral term at an end of a scan region accounting for a forward slope of said substrate as a reverse integral term accounting for a reverse slope of said substrate upon reentering said scan region".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Seung C. Sohn whose telephone number is (571) 272-2446. The examiner can normally be reached on Monday through Friday from 8:30 am to 5 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Porta can be reached on (571) 272-2444. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
